

This document contains the Ham Radio and miscellaneous equipment of Silent Key Lloyd Peterson, WD4SLL (formerly K7EUQ). I have been asked by Lloyd's widow to assist her in finding a good home for all of it.

I have helped several people sell equipment but don't think I have EVER SEEN equipment in such immaculate condition. All the Kenwood 820 series HF equipment and the Yaesu FRG-7 receiver are like new. The TV-506 6-meter Transverter is actually new. I unpacked it to photograph it. The same is true with many other items such as the Vibroplex keyer, the MFJ-941 Versa Tuner II, D-104 Mic, and the American Electronics Model 95-139 SWR/Field Strength Meter. The list goes on.....

I did some price searching on eBay and a few Ham equipment web sites and came up with what I think is a fair price. If I am way off just let me know. If I under-priced something and you feel Mrs. Peterson should get a better price, please let me know that as well.

ALL ITEMS ARE FIRST COME, FIRST SERVED. I can be contacted by email or by cell phone. If you want an item I will check my email time stamps for the winner. If you want to see, inspect, and/or operate the equipment just let me know. I have it all set up in my shack for quick setup and operation. I do not have a 6 meter antenna but we can figure out something.
